

Press Release

01/05/2015

New Specification Engineer role at Schöck

Chirag Patel has been appointed to the newly created position of Specification Engineer at Schöck. In this role, designed to enhance the already extensive technical team support available from the company, Chirag will provide technical guidance and assistance to specifiers, structural engineers and other users in the design principles and most effective use of Schöck structural thermal break elements. This is through a combination of direct contact and use of the advanced software available from the company.

It is part of the Schöck ethos that customer satisfaction plays a key role in the company's behaviour and this applies as much to developing services as it does to developing products. By necessity the engineers in the technical team are primarily project orientated, working closely with clients on specific day-to-day issues. However, it is recognised that there is scope for a role with a broader more 'educative' approach, placing greater emphasis on the general principles of thermal break issues and good design practice

As a result, In addition to providing expert advice, Chirag will offer lecturing and training sessions, including advanced CPD seminars, with the purpose of ensuring safe in-house project design for a wide variety of users.

Chirag joined Schöck in 2011 as a Design Engineer, after gaining an M.Sc. in Civil and Structural Engineering from the University of Sheffield in 2006. Prior to that, he was originally a site engineer for MNC in India; before moving to the UK to complete his degree course, then joining an Oxfordshire based consultancy company as a graduate structural engineer.

Notes to the editor

A leading European supplier

Schöck has grown to become Europe's leading supplier of innovative structural load bearing insulation products. The main product is the Schöck Isokorb – a thermal break for various types of cantilever constructions in new buildings and for renovation. Its headquarters are at Baden-Baden in southern Germany and there are subsidiary companies in Great Britain, France, Austria, Switzerland, Italy the Netherlands, Belgium, Poland, Hungary, Russia, Japan, Canada and the USA. Sales teams and partners operate in many other European countries and also Australia and South Korea. Schöck is committed to providing the highest level of technical back up and comprehensive customer service to the construction industry.
